

KPS CHAUHAN

UNREAL ENGINE DEVELOPER

Baghpat, Uttar Pradesh, India - 250601 | +91 8410942438 | chauhanj2000@gmail.com | [Portfolio](#) | [LinkedIn](#)

SUMMARY

Unreal Engine Developer with hands-on experience building gameplay systems in Unreal Engine 5 using C++ and Blueprints, including character movement, traversal, animation integration, and multiplayer gameplay. Currently developing a multiplayer shooter in C++ focused on client-server architecture, server authority, replication, RPCs, and actor ownership. Shipped two commercial titles and actively expanding engine-level and dedicated-server networking expertise.

TECHNICAL SKILLS

Unreal / Programming: Unreal Engine 5, C++, Blueprints, Gameplay Programming, Character Movement

Multiplayer: Client-Server Architecture, Replication, RPCs, Actor Ownership, Player State, Multiplayer Sessions

Tools: Git, GitHub Desktop & CLI, Steamworks, Epic Developer Portal, ZBrush

PROFESSIONAL EXPERIENCE

Lead Game Developer | Jabsz Gaming Studio

Sept 2024 – Present

- Developed gameplay systems and traversal mechanics for ParkourPulse in Unreal Engine 5.4, including vaulting, climbing, and traversal using Blueprint gameplay logic, tracing, and animation systems.
- Integrated Advanced Locomotion System (ALS), motion warping, animation montages, and gameplay tags with custom character movement.
- Built gameplay programming and UMG UI systems and debugging tools, contributing to the release of TripleSix on the Epic Games Store.
- Managed Git-based project collaboration and supported game build preparation, deployment, and publishing workflows.

PROJECTS

Multiplayer Shooter — Unreal Engine 5 / C++ • In Development

- Building a multiplayer shooter focused on client-server networking, server authority, and replicated gameplay state.
- Implementing combat flow with Server and Multicast RPCs, actor ownership, and Player State; adding multiplayer session creation, discovery, and joining via Online Subsystem / Steam.
- Debugging client/server synchronization and extending the project toward dedicated-server multiplayer.

C++ Climbing System — Unreal Engine 5 / C++

- Built a climbing system in Unreal Engine C++ with hopping, motion warping, and Control Rig / root-motion techniques.

3D Drone Simulator — Unreal Engine 5 / Blueprints

- Created a realistic 3D drone simulator featuring dynamic weather control and gameplay-focused flight interaction.

CERTIFICATIONS

- Unreal Engine 5 C++: Climbing System — Udemy • Jun 2024
- Unreal Engine 5 - Traversal Parkour System using Blueprints — Udemy • Apr 2025
- Unreal Engine 5: Advanced Locomotion System (ALS), Intermediate — Udemy • Apr 2025

EDUCATION

M.Sc. Game Technology | ICAT Design and Media College, Bengaluru

2022 – 2024

B.Sc. Mathematics | Subharti University, Meerut

2019 – 2021

SHIPPED GAMES

- ParkourPulse** — Parkour-based PC game, published on Steam
- TripleSix** — PC horror game, published on the Epic Games Store
