Professional Summary

Passionate **Unreal Engine Game Developer** with hands-on experience building and shipping games using **Unreal Engine 5.4**. Skilled in developing gameplay systems, traversal mechanics, and animation integration using **Blueprints and C++**. Experienced with **Advanced Locomotion System (ALS)**, **motion warping**, **animation systems**, and **gameplay mechanics** for immersive gameplay.

Successfully contributed to the release of commercial PC games and worked with **Steamworks**, **Epic Developer Portal**, and **Git-based version control**. Strong problem-solving skills with a focus on performance optimization, gameplay programming, and system integration.

Technical Skills

Game Development

- Unreal Engine 5 (Blueprint & C++)
- Gameplay Programming
- Parkour & Traversal Systems
- Animation Systems (ALS, Motion Warping, IK)
- Gameplay Tags & Data Assets

Programming Languages

- C++
- C# (Basic)

Tools & Software

- Unreal Engine 5.4
- GitHub (Desktop & CLI)
- Blender
- Autodesk Maya
- Substance Painter
- ZBrush
- Unity Engine (Basic)

Additional Skills

- Version Control (Git)
- Debugging Gameplay Systems
- UI Implementation (UE UMG)
- Technical Art Integration

Professional Experience

Lead Game Developer

Jabsz Gaming Studio — Jan 2025 – Present (WFH)

- Developed gameplay systems and traversal mechanics for **ParkourPulse**, a parkour-based action game built in Unreal Engine 5.4.
- Implemented parkour features including vaulting, climbing, and traversal using **Blueprints, tracing techniques, and animation systems**.
- Integrated **Advanced Locomotion System (ALS)** with custom parkour mechanics.
- Worked with **motion warping, animation montages, and gameplay tags** to enhance character movement.
- Managed version control and project collaboration using **GitHub**.
- Assisted in game build preparation and deployment pipelines.

Technologies: Unreal Engine 5.4, GitHub, Epic Developer Portal, Steamworks

Lead Game Developer

Jabsz Gaming Studio — Sept 2024 – Dec 2024 (WFH)

- Contributed to gameplay programming and UI implementation in Unreal Engine.
- Developed gameplay systems and debugging tools using Blueprint scripting.
- Collaborated on game builds and publishing workflow.

Achievement

- Successfully contributed to the release of **TripleSix**, a PC game published on the Epic Games Store.

Projects

College Project:

- Created a 3D Realistic Drone Simulator Game (College Final Year Major Project) using Unreal Engine Blueprints, Dynamic Weather control, smooth gameplay.

Udemy Courses:

- **Unreal Engine 5 C++ : Climbing System:**

Created a climbing system using Unreal Engine C++ with hopping and motion warping for advanced character movement, and used control rig for root motion.

Certificate Link:

- **Unreal Engine 5 : Traversal Parkour System using Blueprints:**

Learned to effectively use different tracing techniques (sphere, line, capsule, box), vector math, inverse kinematics (IK), motion warping, animation montages and notifies, gameplay tags, and data assets.

☐ **Certificate Link:**

- **Unreal engine 5 : Advance locomotion system ALS (Intermediate):**

Learned advanced locomotion systems, PCG, distance matching, sync groups, linked animations, advanced UI, and basic AI.

Certificate Link:

Education

M.Sc. Game Technology

ICAT Design and Media College, Bengaluru
2022 – 2024

B.Sc. Mathematics

Subharti University, Meerut
2019 – 2021

Higher Secondary School

Mathematics, Physics, Chemistry
2016 – 2017
